BOOZ ALLEN ANALYTICS: THE POWER OF DATA

WHERE "WHAT IF?" BECOMES "WHAT'S NEXT?"

You can join a company—or you can join a movement. At Booz Allen, we've spent more than a century exploring ocean depths and outer space, transforming industries and governments, safeguarding the valuable, and strengthening the vulnerable.

From analytics to cyber, digital solutions to engineering, we're empowering people to change the world—starting with *you*.

YOU JUST GENERATED 1.7 MEGABYTES OF DATA

Now multiply that by 7 billion people every second. The world's data flow is increasing exponentially and it's not going to stop. To us, that's not overwhelming: it's awe-inspiring. Data can yield powerful insights if you ask the right questions and have the talent to decipher the answers.

At Booz Allen, we're not content with incremental change. Our goal is to bring people together from different backgrounds and perspectives to transform business and society with data science. Yes, it's lofty. But we're already doing it:

- **Machine Intelligence** enables a collaboration between computers and people that empowers us to do more for our world than we ever thought possible.
- **Data Science** pushes us to drive change by finding the questions we never knew to ask of our data and then identify the right answers.
- **Health Solutions** harnesses varying data sets, including genomic, clinical, and behavioral data, to treat and prevent disease for each individual in the most efficient and effective way.
- **Immersive Experience** creates intense and realistic training experiences to better enable military readiness, introduces new and more efficient ways to run business and mission operations, and disrupts industries with enhancements to how we work together to achieve a better world.

Key Facts About Booz Allen:

FOUNDED
1914

HEADQUARTERS
McLean, VA

EMPLOYEES
More than 22,600

COMPETITION. COMMUNITY. CHANGE.

We bring the global data science community together through social good efforts like the Hackathon for Hope, Data Science Bowl, and The Early Warning Project. Using advanced techniques such as deep learning and AI, we've put our collective brain power to work to determine algorithms that analyze ocean health and improve how doctors use MRIs. This year, we took on lung cancer—join us and see what we'll tackle next.

WHAT'S NEXT? YOU TELL US.

We depend on our people and we invest in their success. We're constantly launching and supporting firmwide training and mentoring programs like the Data Science 5k Challenge, Data Science Bowl, hackathons, and meetups. With an engaged community already thousands strong, we intend to continue to build on and offer new opportunities for our experts to grow while focused on solving the hard problems and supporting our client missions.

FINDING YOUR FIT

Whether you love solving problems, engineering ideas, or building solutions, there's a place for you at Booz Allen. We're looking for curious, creative people to join our team of data scientists:

- Data Scientist
- Data Architect/Engineer
- Data Visualization Analyst
- Biomedical Data Scientist

- Cost Estimator
- Geospatial Remote Sensing Analyst
- Intelligence Operations Analyst
- National Security & Policy Analyst
