

# BOOZ ALLEN DIGITAL SOLUTIONS: LEADING IN A DIGITAL-FIRST WORLD

## FAST FORWARD

We like to stay ahead of our time. From pioneering modern management consulting, to plunging into the ocean depths, to designing systems that keep weapons of mass destruction out of the hands of terrorists, we work to understand, protect, and advance humanity.

We work shoulder to shoulder with our clients to solve their most challenging problems—ones where there are no roadmaps. Our team is responsible for every step forward we take. Whether they're in consulting, analytics, digital solutions, engineering, or cyber, we empower people to change the world—and we'll do the same for you.

## AT THE HEART OF THE MISSION

Ever wonder who's fighting global terrorism? Strengthening defense? Improving government efficiency? We are. Our people design and deliver secure, scalable systems and software development services that don't settle for one approach to problem solving. At Booz Allen, you'll be part of a powerful digital solutions team that consistently sets the industry bar—and then surpasses it.

## THE POWER OF WE

Our **Digital Solutions Network** is a community of digital professionals working in integrated teams from open-plan offices across the country: Laurel, Maryland; Herndon, Virginia; Chantilly, Virginia; Norfolk, Virginia; Charleston, South Carolina; and San Diego, California. Each of our six hubs has different capabilities but we all share a startup environment and a drive to leave the world better than we found it.

- **Enterprise Modernization** brings together technology and business leaders to create a shared vision for the digital enterprise—and then make it a reality.
- **Digital Experience** uses beautiful design to create intuitive, responsive, reliable, and effective digital experiences.
- **Modern Software Development** unites innovative software development methodologies, technologies, and architectures.
- **Cloud and Data Platforms** navigates large-scale cloud migrations to create open, scalable, and extensible platform architectures and infrastructure.
