

# BOOZ ALLEN ENGINEERING & SCIENCE: WORK ON THE EDGE OF WHAT'S POSSIBLE

## THE POWER OF PEOPLE

Since our founding more than 100 years ago, we've transformed industries, explored the ocean depths, and put a man on the moon. And by "we," we mean people like you. People who don't just work to live—they work to help others live better.

We have diverse backgrounds in engineering, analytics, digital solutions, consulting, and cyber, but one common goal: empowering people to change the world—starting with you.

## YOUR IDEAS ARE OUR REALITY

Imagine standing on a launch site, watching what you built blast into space. Or finding ways to keep our soldiers safe. Imagine improving the accuracy of GPS, or developing renewable energy sources. Every day our team imagines ways to keep our nation safe. And then we build them.

We partner with defense, intelligence, law enforcement, homeland security, and international sectors, working from a network of 27 labs and facilities across the country. Our more than 3,000 engineers and scientists solve pressing issues in:

- **Directed Energy:** pushing technological advances through integration and scaling
- **Resilient Position, Navigation, and Timing:** improving the performance and safety of GPS
- **Unmanned Systems:** developing and supporting on land, sea, and air
- **Systems Engineering and Integration:** integrating disciplines to develop and deploy complex systems
- **C4ISR:** collaborating with operations and acquisition to help government and military organizations build systems
- **Sustainment Engineering:** incorporating platforms, payload, retrofitting, and modernization
- **Infrastructure, Energy, and Environment:** helping public sector agencies with sustainability, renewable energy, climate change analysis, and design development management
- **Science:** combining science and technology to solve real-world problems.

## TO STAND APART, YOU HAVE TO STEP UP

Our engineering experts don't back down from a challenge. In fact, they thrive on solving today's most complex technical problems. In exchange for their courage, Booz Allen supports our team in ways you won't find anywhere else.

We nurture a truly collaborative culture where opportunity and integrity aren't corporate buzzwords—they're what we live and breathe every day. We're committed to empowering our people through mentorship, funding, time, and training. That empowerment extends to our communities too, where we volunteer time, energy, and heart to improve the neighborhoods we share.

The reason to join Booz Allen is bigger than our capabilities, reputation, and history. Join us because of what we can do for you, and what we can do for the world together.

## FINDING YOUR FIT

Whether you love solving problems, brainstorming ideas, or building solutions, there's a place for you at Booz Allen. We're looking for visionaries with fresh perspectives to join our team of engineering and science professionals:

- Systems engineer
- Systems administrator
- Network engineer
- Network administrator
- Mobile systems administrator
- Infrastructure engineer
- Power systems engineer
- Facilities project manager
- Site reliability engineer
- Construction project manager
