The
Eighty-five
Collection

RING PREMIERE
NOV. 1, 1983
The first responsibility for the 1985 class officers was the selection of committee members and chairmen. The 10-member Ring Committee is extremely important, in that the strength of the class depends greatly on the success of the ring program. Six very talented and diversified class members were selected to serve with the President, Male Member-at-Large, Female Member-at-Large, and Cadet Member-at-Large.

After three impressive presentations the committee felt Balfour would provide the best ring at the lowest cost for our class. In order to make the designs as meaningful as possible, the committee, working closely with Balfour, conducted a survey and spent many hours discussing, sketching, and rearranging. The goal of blending Tech tradition with the innovation and character found in the Class of 1985 was finally reached.

The Virginia Tech ring is distinctive among university rings, because each class designs its own. Our proud tradition has developed into the nation's largest ring contract. The 1985 class rings are among the finest of Tech designs and I hope that each of us will proudly wear our ring as a symbol of our meaningful years at Virginia Tech.
Dear 1985 Class Members:

Class rings. Virginia Tech. Tradition. What do these words have in common? Well, when it comes to class rings we here at Virginia Tech can stand proud, for we are fortunate to have one of the richest and most respected traditions of any University. Our roots stretch back to 1914 when a ring, dominated by a distinguished bald eagle on either side, was designed. Since that time the arduous task of redesigning the ring collection has been undertaken each year by a bright, energetic group of elected and appointed class members. The 1985 Ring Committee is no exception. Although this year’s 10-member committee is small by past standards, it represents a cross-section of our class and has realized our class goals far ahead of schedule under the auspicious tutoring of recently relocated advisor Bob Lineen.

Through the years of redesigning, many different objects have appeared on the Tech ring to capture the spirit and imagination of graduating classes. Your 1985 class ring has been specially designed for you by a creative team composed of fellow class members and the L. G. Balfour Company. With Balfour’s help several new elements have been designed to make our 1985 class rings unique from their predecessors; however, this new design still carries the tradition established back in 1914.

That tradition is still alive in ‘85. In service to our class,

Todd P. Headley
1985 Ring Committee Chairman
The Official '85 Va. Tech University Side

The University Side of the ring is used to capture much of the tradition at Virginia Tech. At the top of the 1985 ring is the enlarged VPI & SU surrounding our University Shield. A powerful eagle, representing the strength of our class, is a traditional American symbol. Printed on a ribbon within the eagle’s beak is 1872, the founding year of the University, and “UT PROSIM,” “That I may serve,” our school motto. The University Side is dominated by Burruss Hall, the central point of the Virginia Tech Campus. This building, framed by the American flag and your choice of the state or confederate flag, has appeared on almost every Tech ring since 1936. At the bottom of the ring we are reminded that we are the 113th graduating class by Roman numerals CXIII.
The Official '85 Va.Tech Class Side

The Class Side of the school class ring traditionally is used to express some of the values of the class. On the 1985 Class Ring, the scroll in the middle can be seen as a history — the past is logged, then rolled up behind the present, which reveals the sentiment of the time at hand. That sentiment hints at the unseen future to be unrolled. The burning lamp in the midst of the impression indicates the nature of wisdom and, again, the sentiment contained in the scroll. The Class Shield at the top simply reminds us of things we find important and valuable. Important because ours will be

The golden anniversary of Virginia Tech's Ring Dance. And valuable because our entire foundation is built on knowledge — represented here by pages in open books — the source of all great learning, and by the cherry tree of knowledge whose roots dig deep to search out nourishment wherever it may be found.

Finally, part of the aspirations of the Class Officers are manifested in male and female figures. These show the emphasis on unity within the class — that we might pull together and work as a unit to make Virginia Tech '85 the best that ever was!
Giving the 1985 Class Ring a traditional appearance is the classic design of the bezel. An oval stone combined with an oval base provides a timeless look for the ring. The perimeter of the bezel is an interlocking chain of our class year, symbolizing the unity and spirit of our class.

The University Shield serves as the honor point and provides a way to personalize the ring. This shield can hold initials, Greek letters, a diamond, a Dimonique™, the skipper cannon, dogwood blossom, a stone, or personal or Corps initials.

You can also choose to have a smooth shield — appearing plain on your ring.

The 1985 Women's Miniature Ring was chosen by the Ring Committee with the important features of the Men's Traditional Ring in mind.

The University Side is characterized by the University Seal along with a dominant VPI & SU treated in artistic Roman letters. The Roman numerals are incorporated into both sides of the ring, representing the pride our class takes in all aspects of the University and the honor we feel in being the 113th class to be graduated. The Class Side of the ring is dominated by the Class Shield we believe proudly displays important ideas.
incorporated through our class.
The bezel of the ring is characterized
by “Virginia Tech” surrounding the stone
in proud, block letters.
The Miniature Ring achieves both del-
cacy and tradition along
with the symbolism we
feel is so important to
members of our class.

When creating the
Class of 1985’s
Dinner Ring, the Ring
Committee felt classic and
elegant design, along with simplicity,
were among elements that would please
the women of our class. This design for
an ideal ring came about after direct
contact with members of the class and
through serious thought among
members of the committee.

This collaboration of ideas resulted in
VPI and SU and 1985 artistically
engraved on either side of slender offset
bands. These bands frame the
distinctive marquis cut stone. The shape
of the stone and the offset bands,
we feel, compliment each other
and add to originality.

We are both proud and
honored to present a ring
that we believe acts not only
as a symbol of our class but as
a ring to be cherished and worn years
after graduation.

The Women’s Dinner Ring is available
with your choice of simulated
birthstones, genuine Mother-of-Pearl,
genuine Wyoming Jade, or genuine onyx.

Another option is placement of a
10-point diamond, Dimonique™, or birth-
stone set in the center of the black onyx.
The Class of 1985 Ring Committee proudly presents this year’s line of Men’s Signet Rings. The 1985 selection offers the largest variety of options in Tech’s history. We’ve designed each ring to represent our class and our unity — a proud tradition of Virginia Tech.

Each style signet may be combined with an almost endless supply of options. Signets are offered for the first time with a wide selection of stones. The signet selection includes: oval or antique shaped rings, any color onyx with diamond sets, encrusting, engraving and, for the first time, Tiger’s Eye and Jade Sardonyx.

The 1985 Ring Committee believes that the new dimension and variety in Men’s Signet Rings will enable every class member to become an intricate part of the Class of 1985 and serve as an everlasting memory of his or her years at Tech.
The Women's Signet Ring collection has been designed with sophistication, tradition, and elegance as our main objectives. The Ring Committee felt the Women's Signet Ring should complement the wearer's hand, adding beauty and elegance. Two different designs allow for a variety of options to satisfy everyone's tastes.

The traditional oval and antique signet rings are scaled to complement a feminine hand. The design is similar to the Men's Signet Ring with slight changes in placement of the '85. Either a stone or metal backing with encrusting, engraving, or creasing is available on the stone.

The 1985 Ring Committee believes these ring designs allow for individual qualities of class members to shine. These Class Rings create a sense of unity by their tying factor — a unique design which will be treasured for years to come.

This year, the Ring Committee has also turned a traditional, old-fashioned ring into one that retains the "old elegance" but has a new feeling of style... the Women's Nostalgia Ring.

The sides of this ring are created in two tiers that slope down to platform an engraved "1985" and "VT." These dual levels add facets to catch the light and make this ring sparkle.

The top of the ring features our University Crest set on a gold backing or one of a variety of stones. The lines of this ring are smooth and delicate — adding to its beauty.

The Nostalgia Ring is unique because the style itself is dateless, original, and created strictly for 1985 class members.
The Traditional and Women's Miniature ring base price includes our 12 simulated birthstones and synthetic sapphires available with a smooth or cut top. (Genuine black onyx, Mother-of-Pearl, Sardonyx, and Wyoming jade are available with a smooth top only.)

We also offer various Hope Stars® and genuine stones at extra cost. You may also wish to have a diamond set into your center stone. (A black onyx with a diamond is a popular choice.) Prices for grade C diamonds are listed on your order form but other grades are available. You may even provide a diamond of your own to be set in your stone; your Balfour representative can review any restrictions that apply.

Dimoniques™, a fine grade of cubic zirconia, are an affordable alternative to genuine diamonds and provide that look of fine jewelry.

For Signet and Dinner Rings, refer to those sections for your stone options.

An ENCRUSTING is a letter or design cut into the top of your stone and inlaid with gold. It's available on most rings.

Traditional Rings for men and women can have: German Club emblem; Three Greek letters; Fighting Gobbler; VT; Forestry emblem; Skipper Cannon; or any personal initial.

The VPISU monogram is available only on men's Traditional.

The Miniature's size does not allow for encrustings. Signet and dinner rings only can be encrusted with VT because of the small size and intricate design.

An ENGRAVING is a design cut into your stone with NO gold inlay.

Dinner and Signet Rings can be engraved with: University Seal; VT; VPISU symbol.

Traditional rings do not have engraving available.

A University Seal CREST is available on Signet Rings. This is a gold image of the seal anchored to the top of your stone.

FIREBURST stones are available in Traditional and Miniature rings. These stones are cut on the back with rays radiating from their centers for maximum light refraction. Available in smooth or cut top for all simulated birthstones.

PROTECTED EMBLEMS are metal shims placed behind simulated gemstones. Available on Traditional rings only, they are most effective with a light-colored smooth top stone. Choose from: University Seal; Highty-Tighty; Forestry Club; Fighting Gobbler; Skipper Cannon; VT; Corps shield; VPISU monogram; or German Club.
Our 1985 Virginia Tech Rings are available with several options. Some options are limited to certain rings because of their individual sizes and designs. All these rings are on display at our Ring Premiere and at ordertakings.

The ring case is located in the lobby area of the Squires Student Center, first floor. It will display all rings and options available throughout this academic year. Your Balfour representative will assist you in ordering your ring.

Your 1985 Class Ring is available in yellow, white, or green 10 and 14 karat gold. All karat gold rings are made with plumb gold. All 1985 Rings are also available in Gold Tone or white Celestrium®. White Celestrium® is a tarnish-free non-allergenic jeweler's alloy with the look and feel of white gold. Gold Tone Celestrium™ adds a sheathing of titanium nitrate to give your ring a golden color and extra durability. Both are fully warranted.

We can engrave inside your ring your full name and social security number in block or script letters. Because of its petite size, a woman's dinner ring can be engraved with three initials only; the miniature can have three initials and either the year date (“85”) or degree initials (“BA”).

All Traditional Rings and the Women's Miniature come with a choice of finish — light, medium, or dark.
The Committee recognized the uniqueness of developing a symbol or logo dedicated to its class members. This symbol incorporates the shape of the University Shield, emblazoned with an open octagonal figure representing the numeral eight. The torch of knowledge is designed from the Roman numeral five, while the flame incorporates the VT monogram. The octagon, unbroken, is a symbol of unity. The torch represents a spirit, a desire to obtain the finest education available — a spirit to make the Class of 1985 the finest in the long history of Virginia Polytechnic Institute.
Our ring ordertaking schedule is listed on the back cover. Balfour's representatives will help you to complete ring order forms at all order-taking sessions.

You must pay your class dues before you can purchase a 1985 Virginia Tech Class Ring.

Our Class of '85 Ring Program offers several payment options:

1.) Place a (minimum $30) deposit with your order, and pay the balance when your ring is delivered. Use cash, money order, or personal check.

2.) Pre-pay your entire order with cash, money order, personal check, or VISA/MasterCard. This entitles you to a $15 discount on your order.

3.) Use your VISA or MasterCard to pay your deposit, balance due, or full payment. If the card is not in your name, please provide a signed authorization listing the cardholder’s name, address, account number, and expiration date.

4.) Place a (minimum $30) deposit by any of these methods and continue to make partial payments until your ring is ready. NO FINANCE OR SPECIAL CARRYING CHARGES FOR THIS SERVICE!

If you’ve not paid your balance when rings are delivered, you can make partial payments until your balance is cleared. We cannot release your ring until your balance is paid in full.

Ask your Balfour Representative during ordertaking for information on this no-interest partial payment program.

5.) Trade in any fully-marked karat gold jewelry at all ring ordertakings. We'll credit gold salvage value toward your purchase of a 1985 Virginia Tech Ring.

![Gift Certificate]

19
In 1913, Lloyd G. Balfour recognized a need to provide high-quality jewelry to a fraternity and jewelry market long plagued by inconsistent quality and delivery. Since then, Balfour has become one of the world's largest providers of emblematic jewelry. For more than 70 years, we have maintained the solid standard of quality our name represents.

We're able to maintain that standard because of our unique standing as a privately-owned international company. We dedicate our design capabilities and craftsmanship to the production of the finest class rings available — and not to the production of dividends for stockholders.

As we've increased our financial strength, we've returned our profits to the Company for technological improvements — such as our state-of-the-art CAD/CAM equipment and our new refinery. Lloyd Balfour's first concern was his employees; his will, administered by a charitable trust, provides for maintaining our people-oriented policy and standard of high quality. All V.P.I.S.U. Rings will be produced in the main Balfour facility in Attleboro, MA. This is only one of many manufacturing facilities, for both rings and graphics, across the United States — and it's the sight of Balfour's corporate headquarters.

The meaning and tradition Balfour class rings have today can be summed in one word — PRIDE. Balfour takes as much pride in crafting your class ring as you do in wearing it.

Balfour — when you're serious about quality.
1. All Virginia Tech 1985 class rings are guaranteed against defects in materials and workmanship for life.

2. All stones included in the base price and all stone decorations are fully guaranteed and will be replaced without charge at any time. Diamonds greater in size than 10 points and genuine stones not included in the base price are excluded from the free replacement clause.

3. All Virginia Tech 1985 rings may be resized without charge for as long as the ring exists. If a student desires to have a new ring made for sizes greater than one half size, the charge, after graduation only, will be $30 plus the return of the original ring.

4. Rings which are accidentally damaged will be replaced prior to a student's graduation for a charge of $25 plus return of the damaged ring. After graduation, the charge to replace a damaged ring may increase by 10 percent per year over the $25 pre-graduation charge, up to a maximum charge of $50 (8th year). Genuine stones and diamonds greater in size than 10 points will be replaced at the cost which is current at the time of repair.

5. If a student is not totally satisfied with his or her original choice of finish, Balfour will refinish the ring at no charge. Finishes are guaranteed for life and this option may be exercised at any time.

6. Additional rings may be ordered at any time. After the first year's order dates, the cost of rings will be determined by the cost of gold and stones at the time of ordering, plus the manufacturing costs.

7. A student who changes colleges at Virginia Tech after a ring is ordered, may return a ring to receive a ring with the proper designation at no additional cost.

8. A student who fails to graduate with the class designated on the ring may return that ring to receive a full refund.

9. Several ring adjustment times will be scheduled with company representatives present on campus. After a student's graduation the cost of shipping, insurance, and handling will be the responsibility of the ring owner.

10. Any college, junior college, or high school gold ring will be credited at current gold salvage value towards the purchase of the Class of 1985 V.P.I. & S.U. ring. Current trade-in value will be available at all ordertaking sessions.

11. Disputes about the validity of warranty claims will be resolved by the Ring Committee until the time of a student's graduation. Thereafter, Virginia Tech will designate a staff member with responsibility to work with the ring company. The company agrees to abide by the decision of the Ring Committee or the Virginia Tech staff representative.
