**A Snapshot of State Funding at Virginia Tech**

---

Virginia Polytechnic Institute and State University

Produced by the Office of University Relations and the Office of Government Relations
Total state funding for Virginia Tech is less today than seven years ago, even though enrollment is higher. Adjusted for inflation, this represents a loss of 23 percent of buying power.

The cost of education has increasingly shifted to the student. Virginia Tech continues to hold down costs. This has been true for decades. Adjusted for inflation, the cost is less today than in 1990-91.

Enrollment of Virginia students continues to climb while state funding falls.
